### PROFILE

Aspiring Python Full Stack Developer with hands-on experience in developing and deploying web applications. Passionate about leveraging modern technologies to solve real-world problems while continuously learning emerging trends in the tech sector

### PROJECTS

#### Medical Store Management System (Python/Django, React )

- Designed and developed a medical store management system using React and Django.
- Implemented user authentication to ensure secure access.
- Enabled CRUD operations for adding, updating, and deleting medicines.
- Added a search feature to find medicines easily.

#### Movie Booking Website (Python/Django,React )

- Developed a movie booking system using React for the frontend and Django for the backend.
- Designed two interfaces: Admin and User.
- Enabled admins to manage movies by creating, editing, enabling, or disabling them.
- Enabled users to book and download movie tickets.
- Integrated Razorpay for secure online payments.

#### My Personal Portfolio (React/Vite/CSS)

- Developed a personal portfolio website using React and Vite
- Showcased projects, skills, and experience in a structured layout.
- Implemented responsive design for a seamless user experience.
